Why Scrum?

Scrum is one of the most popular agile methodologies. It is an adaptive, iterative, fast, flexible, and effective methodology designed to deliver significant value quickly and throughout a project. Scrum ensures transparency in communication and creates an environment of collective accountability and continuous progress.

The Scrum framework, as defined in the SBOK[™] Guide, is structured in such a way that it supports product and service development in all types of industries and in any type of project, irrespective of its complexity.

What will you get from the course?

- You will become familiar with the concepts, advantages, and challenges of the Scrum methodology.
- You will be equipped with the knowledge needed to be the Scrum Master or developer in your organizations and help your organizations adopt Scrum methodology. Furthermore, you will develop an understanding of all the roles in Scrum.
- You will have experience carrying out a Scrum project through simulated case studies.
- You will gain knowledge to identify and anticipate issues related to the practical implementation of scrum.
- You will be armed with the proper tools to address, resolve, and take the lead on Scrum issues in your organizations.
- All-inclusive without any hidden cost (Study material, Live Instructor or Online self-study videos and Exam Voucher with 2 free attempts)
